

Advanced Level Timer Nvis 09D

The Timer circuit consists of two parts one is Up Timer and another is Down Timer. User can set the time maximum up to 0 sec to 60 minutes (up timer) & 60 minutes to 0 sec (down timer). Buzzer is provided on the PCB, which will turn on when set time is completed .

Features

- Visualization of set timer on LCD.
- Simple, safe and easy to perform. Visualization of set timer on LCD.
- Precise setting in minutes and seconds using different switches.
- Descriptive operating manual with procedure.

Technical Specifications

Power Supply	: 230V, 50 Hz AC
Transformer	: 230/0-9 150mA
Crystal	: 11.0592 Mhz
IC	: AT89S52, L7805CV
